

The Facts.

- 20% of U.S. energy is consumed by commercial buildings
- 30% of energy in U.S. commercial buildings is wasted
- Across the U.S. and Canada, many cities are requiring building owners and managers to make significant energy and emissions reductions
- With some types of facilities, operational efficiency savings can be greater than energy efficiency savings by up to 3X

The Problem.

Building data is disappearing. Less than 5% is being captured, stored, analyzed and utilized, resulting in massive operational and energy inefficiencies as well as compounding costs of missed opportunities.

The Solution.

Overnight, Datakwap's cloud-based platform can affordably harness 100% of a building's data, generating real-time intelligence. Turning every piece of energy-operational intensive equipment into its own energy meter or asset management source. Our interactive platform provides our partners with the ability to quickly detect, implement, monitor and verify operational, energy and emissions savings.

Shallow-to-No Learning Curve

With Datakwap's easy to use tools, our Partners have the option to customize the Datakwap platform fast or we can do it for you for little to no cost - increasing our Partnership value.

Quick ROI

Our Partners' typical end customer ROI is less than 12 months. Our Partners are able to be up-to-speed with increased, repeatable services generated revenue within just weeks.

Interactive and Flexible

The Datakwap platform can readily integrate with existing BAS/IoT systems with no added hardware. Additional sensor nodes and deep data source streams can be utilized. Rapid scaling from a single facility to an entire enterprise can be accomplished with efficiency.

The Partnership.

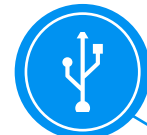

With Datakwap's value stacking methodology, data is assimilated once, but is used anywhere, anytime, by anyone.

Turn data into information.
Turn information into value.

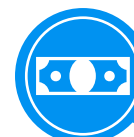

For a standard 150k s.f. office space

Instant onboard

Reduced OPEX & extended CAPX

\$842,000+ valuation increase

\$50,000+ in annual savings

\$100,000 in incentives

Tenant, property manager & building operator happiness
